## PARTS EUROPE

### STARTER MOTORS

- Starters are manufactured to meet or exceed OEM specifications
- Insulated armature for rust and corrosion protection
- Rubber seals on top and bottom side of unit – ensures dry operation for longer life
- 90/10 copper bushings for a longer life

## STARTERS

- Affordable starters are constructed with longer-life bearings than OEM
- Many OEM starter motors have an unprotected output needle bearing on the outside of the output shaft's seal; moisture can and does enter the output cap of the electric motor and follows the armature shaft to the unprotected output needle bearing, which corrodes the bearing
- Rick's takes the extra step of installing a double-sealed ball bearing, with the output shaft seal on the outside of the bearing in their new aftermarket unit

- This simple application of common-sense engineering does two things: first, the outside bearing is now protected from damaging water entry, and second, the sealed ball bearing is replaceable
