INDEX

POWER COMMANDER V

- Fuel control for each individual cylinder in a smaller enclosure
- "Warm up" fuel adjustment (unit reads engine temp and allows fuel/timing adjustments based on the reading)
- Reduced size from the PCIII USB
- Easy to install
- USB powered from computer; 9 volt adapter is no longer needed
- Two-position map switching function built in
- Can add any Single Pole Single Throw (SPST) switch and toggle between two different fuel maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Builds an adjustment table based on analog input such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- More tuning ranges than PCIII USB
- Map switch can be mounted to change between two different maps that have been pre-loaded to the Power Commander V; available separately
- Enhanced "accel pump" utility
- For Offroad and ATV, see appropriate catalog under Moose Power Commanders

SECONDARY FUEL MODULE (S.F.M.)

- Allows for the adjustment of all eight-injectors
- Connects to the upper injector rail using OEM connectors
- Single cable connection to the PCV
- Adjust both upper and lower injectors by as much as +250/-100%
- If gear position input is connected to your PCV, you can adjust all of the injectors on a "per gear" basis
- You can also map each injector separately; giving you up to 48 complete maps
- The "basic" mode allows you to have a single fuel table that simply puts the requested fuel change in both upper and lower injector modules at the same time
- The "basic" mode is the perfect setting for modified engines that require more fuel than four-injectors can provide, but do not need the complexity of mapping each cylinder and each gear separately
- Allows for the use of the Dynojet Quick Shifter sensor on eight-injector bikes, which provides added fuel control and shifter functionality
- See application chart for availability

QUICK SHIFTER EXPANSION MODULE (Q.E.M.)

- The QEM allows the Dynojet Quick Shifter sensor to be used with Power Commander V on bikes that have eight injectors
- The QEM connects to the upper injectors and then into the PCV
- Once the sensor is attached you will have full Quick Shifter functionality

NOTE: QEM is not necessary if using the SFM.

¹ Includes single channel O₂ optimizer.

² Includes S.F.M.

³ Includes pressure temperature input.

⁵ Includes ignition adjustment.

⁶ For European models only.

⁷ Requires additional Dynojet hardware for quickshifter to function; contact Dynojet for more information.

¹⁰ European models require O₂ optimizer for closed loop control.

¹¹ Optional oxygen eliminator available for California and European models; PART #1020-0088.

IMPORTANT NOTE | SEE PAGE 4 FOR IMPORTANT INFORMATION REGARDING CERTAIN WARRANTY AND EMISSION CONTROL REGULATORY COMPLIANCE INFORMATION.

BOLD MAGENTA part numbers are new for 2019

¹ Includes single channel O₂ optimizer.
⁴ Includes dual channel O₂ optimizers.
⁵ Includes ignition adjustment.
⁷ Requires additional Dynojet hardware for quickshifter to function; contact Dynojet for more information.

Dynojet

AUTOTUNE KITS FOR POWER COMMANDER V

- Include Wideband O₂ and Dual Wideband O₂ sensors and controllers that connect to the Power Commander V
- The kits automatically adjust the fuel map while riding
- Include 18 mm bungs

DESCRIPTION	PART #	DESCRIPTION	PART #
Universal fit, single O ₂ sensor kit	1020-0923	Universal fit, dual O ₂ sensor kit	1020-1278

IMPORTANT NOTE | SEE PAGE 4 FOR IMPORTANT INFORMATION REGARDING CERTAIN WARRANTY AND EMISSION CONTROL REGULATORY COMPLIANCE INFORMATION.
