

GPR STABILIZER V4

- Made specifically for sport/road racing bikes
- Designed to help reduce rider fatigue and eliminate headshake, improving lap times
- Proven fluid control technology that's been squeezed, trimmed, and lightened to be smaller, faster and lighter
- Shorter fluid ports, new valving, quicker reaction to high speeds

- Large dial with a definite "no-slip" grip that locks into place with a positive "click" at 20 settings
- Approximately 30% lighter than the GPR original Version 1
- Developed extensively in the World Superbike paddock and the AMA Roadracing paddock

SHOCKS

- Wet born piston rod with self-adjusting bearing
- Radial piston with straight flow and pre-load through a pre-combustion oil chamber guarantees an optimum response
- Made from 7075-T6 Aircraft Aluminum
- Anti-Block-System; a separate pressure valve prevents a hydraulic lock of the shock
- Anti-Fading Damping System; because of the aluminum piston and the steel tube there is no fading in the damping system when the temperature of the oil increases
- Rebound/compression adjuster; 50/30 clicks (compression adjustment only for fully-adjustable shocks)
- Threaded Spring Preload Adjuster
- The modular system creates the possibility to replace every part
- ABE/GTÜ approved unless noted
