STM AUDAX

La frizione STM AUDAX brevettata oltre ad essere concettualmente una frizione assolutamente diversa da ciò finora visto ed immaginato, è anche nata per abbattere i costi della manutenzione ordinaria. Utilizza un sistema innovativo che permette di migliorare alcuni aspetti critici delle frizioni attualmente in commercio utilizzate nel settore off road; Infatti limita l'usura e lo spingidisco è garantito a vita.

STM AUDAX

The STM AUDAX clutch, in addition to being conceptually a clutch absolutely different from what it has seen and imagined so far, was also born to cut routine maintenance costs.

It uses an innovative system that helps to improve some of the critical aspects of today's commercially used textiles used in the off-road sector; In fact, it limits the wear and the pusher plate is guaranteed a life.
