

## Crankshaft and connecting rods

The connecting rods are forged from high quality steel, adjusted and balanced to ensure reliability under extreme conditions of competition. They are equipped with cranks and cages silver treated and strengthened. A wide range of needle bearings, crank pins and washers calibrations is available in spare parts.

The crankshafts are designed with the same quality and finish.

All of our rod kits are delivered with crank pin, cages and washers.

For missing oil seals and bearing please see following pages
